

# Climeworks signs-up Shopify to its carbon dioxide removal programme

**In order to reverse climate change, we need pioneering organizations to take bold actions to support the scale-up of much-needed climate solutions, such as Climeworks' direct air capture technology. Shopify is one such pioneer.**

- Climeworks has been chosen, by Shopify, as one of those solutions
- Pioneering actions like this can inspire others and help scale the technology

Last year, Climeworks made its carbon dioxide removal solution available to the public, allowing people and organizations to have carbon dioxide permanently removed from the air in their name. Since then, many pioneers have joined Climeworks' mission to reverse climate change and now Shopify is one of them.

Climeworks has been chosen as one of the climate-positive projects that Shopify supports through its [Sustainability Fund](#). With this fund, Shopify commits to give a minimum of USD \$5 million annually to the most promising, impactful technologies and projects fighting climate change.

Climeworks is thrilled to reveal that Shopify will be purchasing permanent storage of atmospheric carbon dioxide. This is a win-win for Shopify and Climeworks as this purchase helps to scale and commercialize climate technology for massive impact on the long term. Shopify choosing to purchase carbon dioxide removal from Climeworks, shows that businesses are convinced of the Climeworks' solution and its potential to help reverse climate change. Pioneering efforts, such as Shopify's, increase the demand for carbon dioxide removal and help to make climate positivity more attainable for everyone by supporting the kickstart of a whole new industry.

## Quote Climeworks

"We are pleased to see that ever more people and organizations are joining our journey towards a climate-positive world. The more pioneering customers, the faster the scale-up: Shopify acts as a pioneer leading the way for further private organizations to take bold actions to address their climate impact by removing carbon dioxide from the air with Climeworks."

- Christoph Gebald, co-CEO and co-founder of Climeworks

## Quote Shopify

"For the first year of Shopify's Sustainability Fund, we chose to work with companies with innovative ideas that we believe have the highest potential to reverse climate change. The world needs ambitious entrepreneurs like those at Climeworks to continue pushing the carbon removal frontier, and chart the course for those who will follow in what is shaping up to be humanity's most important industry yet."

- Stacy Kauk, Director of Shopify's Sustainability Fund

## Editor's Notes

## About Climeworks

Climeworks empowers people to reverse climate change by permanently removing carbon dioxide from the air.

One of two things happens to the Climeworks air-captured carbon dioxide: either it is returned to earth, stored safely and permanently away for millions of years, or it is upcycled into climate-friendly products such as carbon-neutral fuels and materials, fertilizer for greenhouses or bubbles in your fizzy drinks. The Climeworks direct air capture technology runs exclusively on clean energy, and the modular CO<sub>2</sub> collectors can be stacked to build machines of any size.

Founded by engineers Christoph Gebald and Jan Wurzbacher, Climeworks strives to inspire 1 billion people to act now and remove carbon dioxide from the air.

Together we can build a climate-positive
